SUMMARY

7+ years of Experience in Analysis, Design and Development of **Web based N-Tier** Applications using **ASP.Net, C#, .NetFramework (4.5, 4.0 & 3.5)** with **Backend as SQL Server 2014/2012/2008/2005**. Good experience in Serverside scripting **ASP.Net, C#, Entity Framework, LINQ, ADO.Net, DB programming, SSRS (Reporting Service)** and **CMS**. Good experience in frontend development and **Responsive** websites using **HTML, CSS, Twitter Bootstrap, Grid CSS, JavaScript, JQuery** and **Angular JS**. **4+ years'** experience in **MVC** framework with **Razor view engine, RestFul Web API**, and **Entity Framework**. Self-motivated, a passion to research and implement new ideas with good organised and management skills.

KEY COMPETENCIES & SKILLS

- **7+ years** of experience in Analysis, Designing, Developing, Testing and Deploying Web Applications using **ASP.NET, C#, MVC, Entity Framework, LINQ, Classic ASP, SQL Server, SSRS, Unit Testing, HTML, CSS, Twitter Bootstrap, Angular JS JavaScript, JQuery, CMS and IIS Server**.
- **4+ years** of good experience of Building Complete Web application on **Umbraco 7.4.3, 7.2.4, 6.1.6, 4.11.3, 4.7** and **Ektron CMS** and Good experience in **XSLT**. Experience on **SiteCore 6.6** and knowledge in **SiteCore 7.1** and **8.1 CMS**
- Good Experience in **SQL Server** Database Design & maintenance, **SSRS**, Writing T-SQL queries, **Stored Procedures, UDF's**, **SQL Jobs** and **Indexes** using **SQL Server 2014/2012/2008/2005**.
- Worked with **Entity Framework, LINQ, PetaPoco, Dapper** and Datasets as part of **ADO.NET** DB transactions
- Implemented projects using **SOLID & DRY principles** and **TDD** development process
- Experience in **RESTFUL Web API**, Developing and Consuming **SOAP Web Services and Service Methods**.

- Good Experience in **HTML, XML, CSS, Less, Twitter Bootstrap, Grid CSS, JQuery, JavaScript, Angular JS**
- Worked in **Windows Azure** and **Amazon Web Services** development environment
- Worked in **Agile (SCRUM) & waterfall** Environment. Knowledge in Methodologies like **DSDM** and **XP**
- Worked with **TeamCity, Octopus** and **CruiseControl** for continuous integration implementation
- Experience in Implementing **Telerik, AjaxToolKit Controls**. Good experience in **TFS, Git, GitHub Tortoise Subversion (SVN), Jira** and **BugNet**
- Good understanding of **UML** design and **Object Oriented analysis** and knowledge in **Core Java**
- Experience/Knowledge in **SEO, Google analytics, Scheme.org, MicroData** and Basic Designing/Correcting Images using **PhotoShop, Paint.Net** and awareness of development standards (**W3C, Microsoft Secured Coding Principles, EU Cookie law**) and Accessibility using NVDA
- Keen team player, ability to acquire new skills within short time scales and can adapt to rapidly changing work environment.

CAREER HISTORY

Vodafone Limited

(July 2016 – Sept 2016)

Software Developer (Contract Position)

Environment: - MVC, ASP.NET, C#, SQL Server 2014, VS 2013, Dapper (ORM), Restful API, Jira, SOAP Service Methods, TeamCity, Octopus, JQuery & GitHub

Responsibilities

- Worked on Contingency application for Siebel Main orders taking Application.
- Built Restful API methods to consume by UC4 scripts for extracting and inserting orders into Siebel application. Build features like Capture customer and product details for orders. Used Dapper (ORM) for database transactions. Created Database, relationships, normalisation, Store Procedures and UDFs for all database transactions. Consumed SOAP Service methods to access latest updated Handset Details, Price plans and Insurance plan information to display on customer product page while capturing an Order.
- Implemented Custom Validators on models for checking payment details, multi address details and other form submission. Working on fixing on going bugs and issues
- Project developed on Agile methodology, TeamCity and Octopus for continuous integration to deploy on to different environments

PHM Group Limited

(June 2016 - July 2016)

Web Developer (Contract Position)

Environment: - MVC, ASP.NET, C#, SQL Server 2014, VS 2013, Angular JS, Umbraco 7.4.3, GitHub, SOAP Service Methods, Jira, TeamCity and Octopus

Responsibilities

- Worked on Leading automobile back office admin application using Umbraco 7.4.3 CMS, MVC, Asp.Net, C#, SQL Server, JQuery, HTML, CSS, TeamCity and Octopus.
- Consumed SOAP Service methods to access all latest car model details, features and offers developed by other team. Worked new features and fixed raised issues and bugs
- Projects implemented on Agile Development methodology and worked on tight delivery time scales

British Red Cross

(July 2016)

Senior Developer (Contract Position)

Environment: - MVC, ASP.NET, C#, SQL Server 2014, VS 2013, PetaPoco Restful API , Trello, Angular JS, Umbraco 7.4.3, GitHub and Windows Azure

Responsibilities

- Remote Work project for a new campaign launch Dine-at-Mine. I development main features Registration, Donation and Email campaign using Lyrshq email service provider.
- Build strongly type page and use Petapoco for inserting data into custom tables. Integrated PayPal Express checkout as a payment gateway
- Used Lyrishq API for adding registered and donation contacts on emailing events portal
- Deployed application in Windows Azure environment and project is on Agile Development methodology
- Projects implemented using Umbraco 7.4.3 CMS, MVC, PetPoco, Asp.Net, C#, SQL Server, JQuery, HTML, CSS

Positive

(May 2016 - June 2016)

Application Developer (Contract Position)

Environment: - ASP.NET, C#, SQL Server 2014, VS 2015, Kentico 9, GitHub, TeamCity & Octopus

Responsibilities

- Worked on as a part of team in building Meetings & Events registration application for a pharmacological society integrated with MS Dynamics
- Worked new features and fixes to an existing investment training websites
- Projects implemented using Kentico 9 CMS, Asp.Net, C#, SQL Server, JQuery, HTML, CSS
- Project is on Agile Development methodology and Octopus for continuous integration to deploy on to different environments

Zone

(Mar 2016)

Software Developer (Contract Position)

Environment: - MVC, ASP.NET, C#, SQL Server 2014, VS 2013, Angular JS, Umbraco 6, 7.2.4 & RESTFUL Web API, GitHub

Responsibilities

- Worked on as an additional resource to finish off features and pending tickets on various projects
- Worked on websites using Umbraco 6.1.6, 7.2.4 CMS, MVC, C#, SQL Server, RESTFUL Web API, HTML, CSS, Angular JS to complete the left over pending tasks and new add on features

M-IS

(Feb 2016)

Software Developer (Contract Position)

Environment: - MVC, ASP.NET, C#, SQL Server 2014, RESTFUL Web API, VS 2013, Angular JS, Windows Azure, GitHub, TFS, Umbraco 7.3.7

Responsibilities

- Built new Members Directory Web Application on Umbraco 7.3.7 CMS using MVC, C#, SQL Server, HTML, CSS, Bootstrap, Angular JS, JQuery. Implemented UmbracoMapper for mapping Doctype properties with Business Models
- Implemented Members Search, Filters and Sorting features using **RESTFUL Web API**. Implemented different panel view modes of member profiles for different screen size and devices used Web API for faster data retrieval
- Implemented Windows Authentications for securing the website integrating with Umbraco members. Implemented emailing features for contacting members
- Worked closely with project producer and designer in suggesting feasible solutions to achieve the required features within given tight deadlines. Drafted full project Handover Document and Application testing

Anthems

(Nov 2015)

Software Developer (Contract Position)

Environment: - MVC, ASP.NET, C#, SQL Server 2014, VS 2013, Angular JS, RESTFUL Web API, Umbraco 7.2.4 & Tortoise SVN

Responsibilities

- Worked as replacement cover for Technical lead developer to finish tasks for project completion
- Worked on websites using Umbraco 7.2.4 CMS, MVC, C#, SQL Server, RESTFUL Web API HTML, CSS, Angular JS to complete the left over pending tasks and new add on features

M-IS

(April 2015 – Oct 2015)

Software Developer (Contract Position)

Environment: - MVC, ASP.NET, C#, ORM (PetaPoco), SQL Server 2014, VS 2013, Angular JS, RESTFUL WEB API, Windows Azure, GitHub, TFS, Umbraco 7.2.4

Responsibilities

- Built Brand new responsive websites on Umbraco 7.2.4 CMS using MVC, C#, SQL Server, HTML, CSS, Angular JS, JQuery. Implemented UmbracoMapper for mapping Doctype properties with Business Models
- Integrated **Active Directory** with Umbraco memberships to access the website and Umbraco BackOffice
- Implemented LoadMore, Like and Search with predictive prompt features for articles display using **RESTFUL Web API**
- Used **PetaPoco** for Custom table transactions on Umbraco DB for storing data of saved, history, and like an article and drawing analysis. Implemented comments features on articles
- Used **Slimsy** Umbraco packages optimising image for all devices and screen sizes
- Building application closely with clients security compliance document and discussing all the implications
- Implemented unit testing to test class in controller and business service classes
- Major contribution towards project Handover Document
- Prepared application Deployment document and application package to deploy on clients environment and assisting with any issues
- Implementing all ongoing issues, change requests and brand realignment features
- Discussing and implementing all features with Frontend developers and Project manager/producer
- Working in Agile Scrum methodology and using GitHub for continuous integration to Azure environment

Sophos Ltd

(Dec 2014 – April 2015)

Software Developer (Contract Position)

Environment: - ASP.NET, C#, Entity Framework, SQL Server 2012, VS 2012, SVN, Jira, Sitecore 6.6 and CruiseControl

Responsibilities

- Working on new features implementation on main company website on Sitecore 6.6 CMS using Asp.net, C#, SOAP Web Services, SQL Server, HTML, CSS, Twitter Bootstrap and JQuery
- Build the existing and non-existing Customer contact portal on main Sophos web site.
- Discussing all tickets with IT Marketing team, Business manager and implementing the features
- Working in Agile Scrum methodology and using CruiseControl for continuous integration

MerchantCantos

(Sept 2014 – Dec 2014)

Software Developer (Contract Position)

Environment: - MVC, ASP.NET, C#, Entity Framework, SQL Server 2012, VS 2013, Git, TFS, Jira, Umbraco 4 - 7 and TeamCity

Responsibilities

- Built Brand new responsive websites on Umbraco 7 CMS using MVC, C#, SQL Server, HTML, CSS, Bootstrap, JQuery. Implemented AutoMapper for mapping Doctype properties with Business object Models
- Implemented New features and handling any upcoming issues for existing clients websites on Umbraco 4 - 6
- Discussing all tasks with project manager & designer and implementing the features
- Worked in Agile Scrum methodology and used TeamCity for continuous integration

Manchester Airport Group

(July 2014 – Aug 2014)

Umbraco Developer (Contract Position)

Environment: - Umbraco 6, MVC, ASP.NET, C#, Entity Framework, SQL Server 2012, TeamCity, VS 2013 & Git

Responsibilities

- Worked on new responsive Manchester Airport web application using Umbraco 6.1.6, uComponents, uMigrate (Doctype, Components, widgets and properties creating API), MVC, Asp.net, C#, Twitter bootstrap, CSS Less, Used TeamCity for continuous integration
- Worked in Agile Scrum methodology and Amazon Web services environment

Care Quality Commission

(Oct. 2013 – April 2014)

Application Developer (Contract Position)

Environment: - ASP.NET, C#, Windows Azure, Entity Framework, SQL Server 2008, VS 2012 & TFS

Responsibilities

- Worked on internal web applications, Deployed an application on Windows Azure
- Designed and developed internal Survey web application using Asp.net, C#, SQL Server 2008, SSRS, Entity Framework (Implemented Stored Procedures and UDF), Telerik & Ajax toolkit, JQuery, CSS, HTML and IIS 7 Administration.
- Good team player by taking lead in the team and support other Developer in project completion and help with any necessary technical issues
- Key responsibility of handling project in deriving technical spec, changing the application interface and design methods of achieving the project requirement within agreed time

Freshfields Bruckhaus Deringer

(Aug. 2013 – Oct 2013)

Web Developer (Contract Position)

Environment: - ASP.NET, C#, MVC, Umbraco & Ektron CMS, Jira, VS 2010/12 and SQL Server 2008

Responsibilities

- Worked in Agile Scrum methodology, worked in Amazon Web services environment
- Analysing, updating and supporting the Main & mobile version website and micro sites on Ektron CMS using Asp.net, C#, SQL Server 2008, Entity Framework, Ajax toolkit, JQuery, CSS, HTML, Twitter Bootstrap and Grid CSS.

- Developed knowledge & insight, news section, subscriptions, find a lawyer and Blogs/Posts features & widgets for Main website and worked with third party API such as LinkedIn
